

HERITAGE

COLLECTION

Parquet wood floors - take your floors from
Ordinary to extraordinary.

BORDEAUX

Passion is core to all that we do. We are passionate about our products, passionate about customer service and passionate about bringing together cutting-edge technology and hand-craftsmanship to create stunning floors that last a lifetime.

Our Family business was established in 1991. Since then we have focused on producing high-end quality hardwood engineered flooring. We appreciate that just as no two trees are alike, each customer is looking for a unique flooring solution that is individually tailored to reflect their character and their living space.

We are passionately proud of our flooring, as are those who work with us – from our timber specialists who travel the world hand-selecting the finest trees to our craftsmen who hand-finish and oversee the production of each plank.

Our Inspiration

Now, almost 30 years later, we now offer more than a thousand variations of engineered hardwood flooring on any continent. Whilst we have expanded, our passionate belief in quality, service and innovation remain the same.

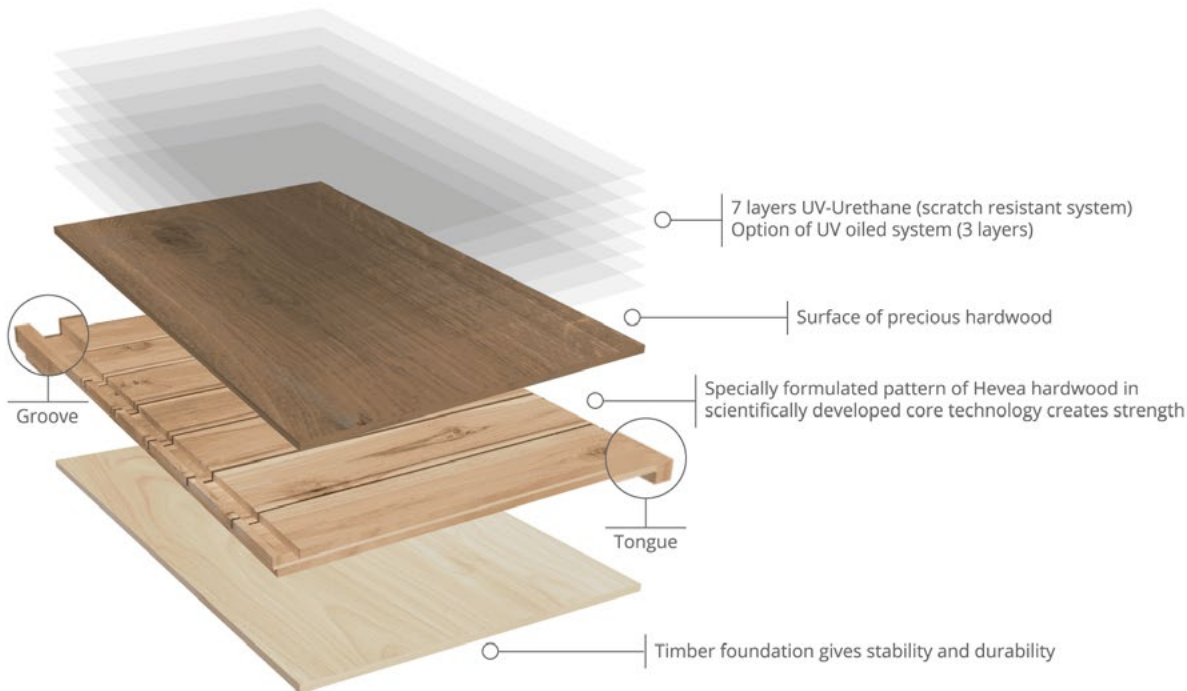

The Heritage Collection is designed to reflect the beauty and character of 18th century reclaimed French Oak flooring. Our magnificent floors bring a luxurious depth and dimension found in aged and worn planks from a time long past.

The Heritage Collection has a wide range of colours from washed to dark hues, with reclaimed characteristics in texture, grain and matte finishes. Each floor maps out centuries-old characteristics found in manor houses and European palaces. With well-worn uneven surfaces, cupped and distressed edges, and open and pronounced knots – the workmanship on these floors is second to none.

Our wide planks exude luxury and authenticity, allowing the floor to continue to age timelessly. Each plank is aged using natural oxidation processes that work with the tannins in the oak. Our floors meet worldwide compliance standards and are 100% environmentally friendly with zero emissions.

What Makes Us Unique

- ❖ We are a family-owned business with strong worldwide partnerships
- ❖ Responsible procurement processes and legality of all raw materials
- ❖ Flexible, reliable customer service and production times
- ❖ Our planks are available in up to six different widths and lengths, with the option of three thicknesses
- ❖ Hevea Brasiliensis is the core layer of each plank; providing greater dimensional stability and can withstand external pressure to change, such as fluctuations in temperature and humidity. This ensures that the all-important core in our multi-layer engineered floors is stronger and more reliable than other species.
- ❖ Available in Tongue & Groove or 5G® Vålinge
- ❖ Suitable for underfloor heating
- ❖ Zero Emissions
- ❖ FSC®/PEFC™/BREEAM® & LEED® v4.1 (options available)
- ❖ World leader in utilising reactive stain technology

BERN

Characteristics of the Heritage Collection

3D Image

When selecting our Heritage Floors, we recommend that you try out our **3D Images**; viewable on our branded websites as well as through our distributor website, forestrytimber.com. These 3D scans were created only for the Heritage collection (on a swatch), and allow for magnification, static and movement, showing dispersal of light and enhancing every minute characteristic and texture of our floors. Although it is a small sample, viewing the planks using the 3D platform will give you a good indication of all the different characteristics while showing the full depth of the plank.

In addition, Forestry Timber has two other revolutionary tools to help clients envision the floor that best suits their space:

Room Visualiser

The **Room Visualiser** – accessible via all of our websites – allows anyone with a mobile device to take a photo of any room and apply any one of our Heritage Collection floors. The app allows people to choose any of our floors, to lay the floor at different angles, and save and share those images with others.

Our **Room Planner** is another great tool to help your clients get an idea of how our floors will look in a variety of settings. As with the Room Visualiser, any of our floors can be used in one of 45 different room scenes – from kitchens and bedrooms to office spaces and boardrooms – and you can customize the direction of the flooring.

These tools have been developed to help customers to make their final decisions with confidence.

Will they prefer Balmoral with its aged look, bowtie joins and multi-width planks? Or the sophistication of Sintra, with its open knots and distressed edges be more to their taste?

ARTISAN

Floors in the ARTISAN category of our Heritage Collection feature uneven surfaces, distressed edges, open knots, and cracks to replicate 18th century reclaimed oak floors.

CASTLE

CASTLE floors are carefully honed and hand-crafted to recreate the surface of centuries-old castle floors, featuring faux cracks and carefully placed bowties to mimic the pegs used to join planks.

OLD WORLD

Our OLD WORLD floors are crafted by our artisans and feature cupped edges, open knots, and a brushed texture that makes every plank unique - creating a stunning, one-of-a-kind floor.

VINTAGE

VINTAGE floors are heavily brushed with open and/or raised knots to evoke the elegance and sophistication of reclaimed 18th century wood floors.

Heritage Collection in multi-width planks

WIDTH	LENGTH	THICKNESS
100 145 190 290mm	1820 2130 2450mm	14.2 22mm
4" 5 3/4" 7 1/2" 11 1/2"	6' 7' 8'	9/16" 7/8"

The retro look continues to be extremely popular worldwide with an increased appetite for old-style fitting patterns and distressed floors. To achieve this look we recommend laying planks of varying widths randomly throughout your space to create a unique and striking floor.

This method of laying multi-width planks throughout is a great way to showcase your floor, especially as no two planks look the same.

These collections are available in the same or multiple widths:
190 | 240 | 290mm or 7 1/2" | 9 1/2" | 11 1/2"

A close-up view of a wood surface with a medium brown tone and a prominent vertical grain pattern. The wood shows natural variations in color and texture, including some small knots and grain irregularities.

Tarragona

A close-up view of a wood surface with a dark brown, almost black, tone. The grain is vertical and very pronounced, with a smooth but slightly textured appearance. There are a few small, dark knots visible.

Segovia

A close-up view of a wood surface with a light tan or beige tone. The grain is vertical and relatively straight, with a smooth finish. There are a few small, light-colored knots visible.

Evora

A close-up view of a wood surface with a dark brown tone. The grain is vertical and very pronounced, with a smooth but slightly textured appearance. There are a few small, dark knots visible.

Strasbourg

A close-up view of a wood surface with a light tan or beige tone. The grain is vertical and relatively straight, with a smooth finish. There are a few small, light-colored knots visible.

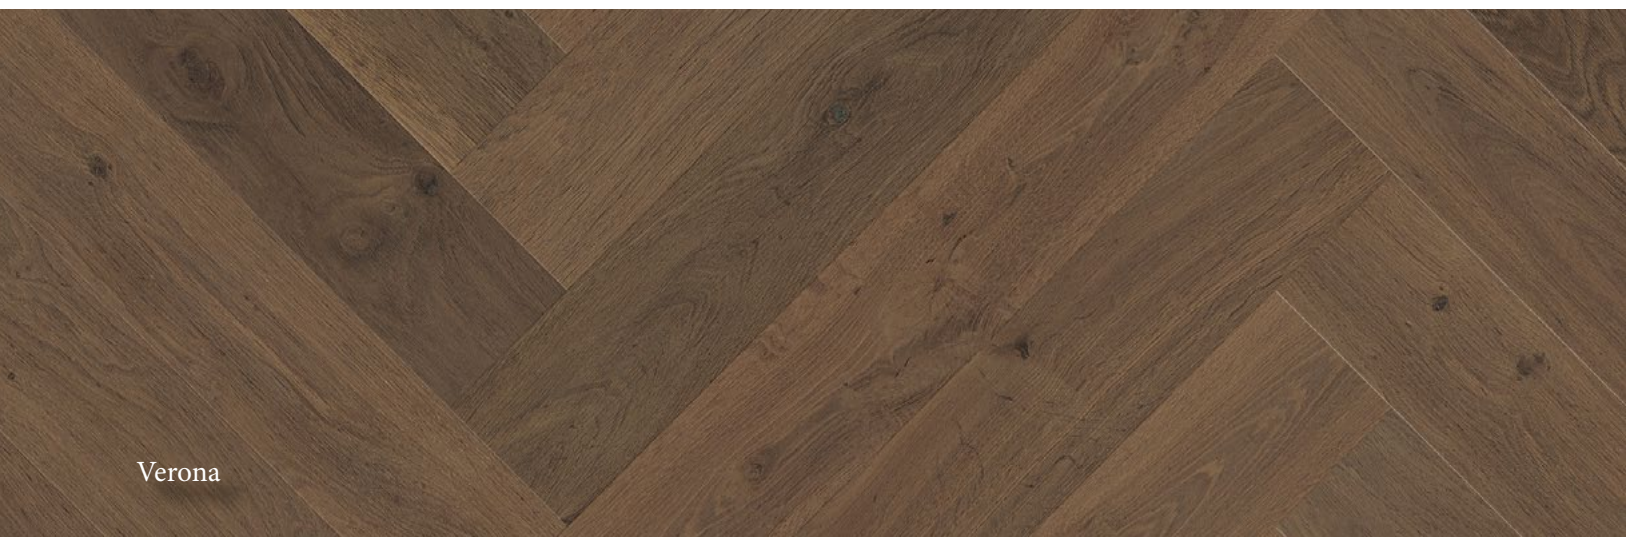

Bordeaux

A close-up photograph of a light-colored wood flooring, likely oak, laid in a herringbone pattern. The wood grain is prominent, showing natural knots and variations in tone. The lighting is even, highlighting the texture of the wood.

Bergen

A close-up photograph of a medium-toned wood flooring, possibly walnut or a similar species, laid in a herringbone pattern. The wood grain is more pronounced than in the top image, with darker knots and a richer overall color. The lighting is slightly darker, emphasizing the wood's texture.

Segovia

A close-up photograph of a dark-toned wood flooring, likely a dark-stained oak or a similar species, laid in a herringbone pattern. The wood grain is very prominent, with dark knots and a rich, dark brown color. The lighting is the darkest of the three, highlighting the wood's texture.
