Variante Collection

Our **Variante collection** of engineered hardwood flooring is designed around a specific selection of European Oak timber. Select forests yield a continual crop of mature oaks which have grown in perfect conditions on untouched soils for centuries. Older trees are carefully removed leaving their branches and foliage on the forest floor to feed the younger trees. From these old oaks, a piece of artistry is contrived. And from the heart of the wood is created Variante. A grade with fine natural cracks for the most authentic timeless floor.
